Terralea Collins

Dear Terralea:

This letter is to formally advise you the Foundation Stock Service® (FSS®) Committee has determined that your petition for the **Volpino Italiano** has met the minimum requirements for eligibility into the Foundation Stock Service® recording program. This breed will be coded for inclusion in the **Toy** group.

We are in the process of setting up the **Volpino Italiano** in our database to accept recordings. This will take from a few weeks up to a couple of months to complete (the timeline is dependent on the current workload for our Programming Department). In order to move forward with FSS® recordings on this breed, we will require some information from you on the approximate number of **Volpino Italiano** in the United States that may be eligible for recording. There are a few options available to process these dogs, and we will discuss those options upon receipt of this information.

One more item we would like your assistance on are with gathering information for inclusion on our web site. Once the Registration Department is prepared to take on recordings, the breed will be added to the FSS® section of the AKC web site. A few of the items that we list on the web site and need to have you fill in the holes on are:
